Physical Science Chapter 4: Atomic Structure 4.1 Studying Atoms Dalton ' s Atomic Theory John Dalton studied the behavior of gases in air, and concluded that gas consists of individual particles. Evidence for Atoms: No matter how large or small the sample, the ratio of the masses of the element in the compounds is always the same. (Compounds have fixed composition.) Dalton proposed the theory that all matter is made up of individual particles called atoms, which cannot be divided. Main ...
