This book addresses one of the most exciting and innovative developments within higher education: the rise in prominence of the creative arts and the accelerating recognition that creative practice is a form of research. The book considers how creative practice can lead to research insights through what is often known as practice-led research. But unlike other books on practice-led research, it balances this with discussion of how research can impact positively on creative practice through research-led practice. The editors posit an iterative and web-like relationship between practice and research. Essays within the book cover a wide range of disciplines including creative writing, dance, music, theatre, film and new media, and the contributors are from the UK, US, Canada and Australia. The subject is approached from numerous angles: the authors discuss methodologies of practice-led research and research-led practice, their own creative work as a form of research, research training for creative practitioners, and the politics and histories of practice-led research and research-led practice within the university. The book will be invaluable for creative practitioners, researchers, students in the creative arts and university leaders. Key Features*The first book to document, conceptualise and analyse practice-led research in the creative arts and to balance it with research-led practice*Written by highly qualified academics and practitioners across the creative arts and sciences *Brings together empirical, cultural and creative approaches*Presents illuminating case histories of creative work and practice-led research

The number of practice-based or practice-led doctorate programs continues to grow across the U.S. Doctoral students who seek a terminal practitioner doctorate typically conduct practice-based research within the dissertation research used as the culmination of the degree program. These terminally degreed graduates return to educational practice to improve practice, impact innovation, and solve the complex problems of practice through research-based decision making. Practice-Based and Practice-Led Research for Dissertation Development provides the most current research, innovation, and insights into practice-based research conducted within U.S. practitioner doctorate programs across fields that include management, education, computer science, health sciences, and social and behavioral sciences. The book illustrates the latest uses of practitioner research and highlights current findings for the dissemination and use of practice-based and practice-led research within these settings. Covering topics that include self-inquiry methods, action research, and high-impact writing support, this book is an ideal reference source for doctoral scholars, doctoral research supervisors, faculty, program deans, higher education leadership, and doctorate program developers.

The Routledge International Handbook of Practice-Based Research presents a cohesive framework with which to conduct practice-based research or to support, manage and supervise practice-based researchers. It has been written with an inclusive approach, with the intention of presenting deep and meaningful knowledge for the benefit of all readers. This handbook has been designed to present specific detail of practice-based research by outlining its shared traits with all forms of research and to highlight its core distinguishing features into a cohesive, principled and methodical approach. To this end, the handbook is presented in five sections: 1. Practice-Based Research, 2. Knowledge, 3. Method, 4. The Practice-Based PhD and 5. Practitioner Voices. Each section begins with a leading chapter that outlines each of the distinct areas as they relate to practice-based research. This is followed by a series of contributing chapters that discuss pertinent themes in more detail. Practitioners from a broad range of backgrounds will find these chapters helpful: research students or final year graduates will be introduced to the principled nature of practice-based research PhD researchers embarking on a research project or are in the flow of research will find this guidance supportive professionals such as designers, makers, engineers, artists and creative technologists wishing to strengthen their research into their practice will be guided through the principled and focused nature of practice-based research supervisors, managers and policy makers will benefit from the potential and rigour of practice-based researchers in the pursuit of new knowledge.

At the performance turn, this book takes a fresh 'how to' approach to Practice as Research, arguing that old prejudices should be abandoned and a PaR methodology fully accepted in the academy. Nelson and his contributors address the questions students, professional practitioner-researchers, regulators and examiners have posed in this domain.

Practice-Based Research shows mental-health practitioners how to establish viable and productive research programs in routine clinical settings. Chapters written by experts in practice-based research use real-world examples to help clinicians work through some of the most common barriers to research output in these settings, including lack of access to institutional review boards, lack of organizational support, and limited access to financial resources. Specialized chapters also provide information on research methods and step-by-step suggestions tailored to a variety of practice settings. This is an essential volume for clinicians interested in establishing successful, long-lasting practice-based research programs.

Designs and Methods for Youth-Led Research provides a foundation from which to plan and implement social research and program evaluation projects that place youth in central roles. In this text, author Melvin Delgado emphasizes how youth-led research represents a profound political and social statement about making relevant research result in significant changes to programs in the field of youth services.

Creative research methods can help to answer complex contemporary questions which are hard to answer using conventional methods alone. Creative methods can also be more ethical, helping researchers to address social injustice. This bestselling book, now in its second edition, is the first to identify and examine the five areas of creative research methods: • arts-based research • embodied research • research using technology • multi-modal research • transformative research frameworks. Written in an accessible, practical and jargon-free style, with reflective questions, boxed text and a companion website to guide student learning, it offers numerous examples of creative methods in practice from around the world. This new edition includes a wealth of new material, with five extra chapters and over 200 new references. Spanning the gulf between academia and practice, this useful book will inform and inspire researchers by showing readers why, when, and how to use creative methods in their research.

'Art Practice as Research' presents a compelling argument that the creative and cultural inquiry undertaken by artists is a form of research. The text explores themes, practice, and contexts of artistic inquiry and positions them within the discourse of research.

Doing Research in Sound Design gathers chapters on the wide range of research methodologies used in sound design. Editor Michael Filimowicz and a diverse group of contributors provide an overview of cross-disciplinary inquiry into sound design that transcends discursive and practical divides. The book covers Qualitative, Quantitative and Mixed Methods inquiry. For those new to sound design research, each chapter covers specific research methods that can be utilized directly in order to begin to integrate the methodology into their practice. More experienced researchers will find the scope of topics comprehensive and rich in ideas for new lines of inquiry. Students and teachers in sound design graduate programs, industry-based R&D experts and audio professionals will find the volume to be a useful guide in developing their skills of inquiry into sound design for any particular application area.
