12 (20) - 17 = 240 - 17 = 223. 223 is greater than 151, so this guess is too high. Therefore, x is between 10 and 20. Try x = 15: 12 (15) - 17 = 180 - 17 = 163. 163 is a little greater than 151, so this guess is a little too high. Try x = 14: 12 (14) - 17 = 168 - 17 = 151. 151 is correct, so x = 14.

As you practice basic math and pre-algebra problems, you'll find that decimals are easier to work with than fractions. To change a decimal to a fraction, put the decimal in the numerator of a fraction with a denominator of 1. Then, continue to multiply both the numerator and denominator by 10 until the numerator is a whole number.
