The Routledge Handbook of Critical Discourse Studies provides a state-of-the-art overview of the important and rapidly developing field of Critical Discourse Studies (CDS). Forty-one chapters from leading international scholars cover the central theories, concepts, contexts and applications of CDS and how they have developed, encompassing: approaches analytical methods interdisciplinarity social divisions and power domains and media. Including methodologies to assist those undertaking their own critical research of discourse, this Handbook is key reading for all those engaged in the study and research of Critical Discourse Analysis within English Language and Linguistics, Communication, Media Studies and related areas.

The authors introduce the various theories, methods and applications associated with the sociolinguistic approach known as critical discourse analysis. The authors assume no previous knowledge of the subject.

Accessible yet theoretically rich, this landmark text introduces key concepts and issues in critical discourse analysis and situates these within the field of educational research. The book invites readers to consider the theories and methods of three major traditions in critical discourse studies - discourse analysis, critical discourse analysis, and multimodal discourse analysis -- through the empirical work of leading scholars in the field. Beyond providing a useful overview, it contextualizes CDA in a wide range of learning environments and identifies how CDA can shed new insights on learning and social change. Detailed analytic procedures are included - to demystify the process of conducting CDA, to invite conversations about issues of trustworthiness of interpretations and their value to educational contexts, and to encourage researchers to build on the scholarship in critical discourse studies. This edition features a new structure; a touchstone chapter in each section by a recognized expert (Gee, Fairclough, Kress); and a stronger international focus on both theories and methods. NEW! Companion Website with Chapter Extensions; Interviews; Bibliographies; and Resources for Teaching Critical Discourse Analysis.

Discourse analysis considers how language, both spoken and written, enacts social and cultural perspectives and identities. Assuming no prior knowledge of linguistics, An Introduction to Discourse Analysis examines the field and presents James Paul Gee's unique integrated approach which incorporates both a theory of language-in-use and a method of research. An Introduction to Discourse Analysis can be used as a stand-alone textbook or ideally used in conjunction with the practical companion title How to do Discourse Analysis: A Toolkit. Together they provide the complete resource for students studying discourse analysis. Updated throughout, the fourth edition of this seminal textbook also includes two new chapters: 'What is Discourse?' to further understanding of the topic, as well as a new concluding section. A new companion website [www.routledge.com/cw/gee](http://www.routledge.com/cw/gee) features a frequently asked questions section, additional tasks to support understanding, a glossary and free access to journal articles by James Paul Gee. Clearly structured and written in a highly accessible style, An Introduction to Discourse Analysis includes perspectives from a variety of approaches and disciplines, including applied linguistics, education, psychology, anthropology and communication to help students and scholars from a range of backgrounds to formulate their own views on discourse and engage in their own discourse analysis. This is an essential textbook for all advanced undergraduate and postgraduate students of discourse analysis.

In this book Michael McCarthy and Ronald Carter describe the discursive properties of language and demonstrate what insights this approach can offer to the student and teacher of language. The authors examine the relationship between complete texts, both spoken and written, and the social and cultural contexts in which they function. They argue that the functions of language are often best understood in a discursive environment and that exploring language in context compels us to revise commonly-held understandings about the forms and meanings of language. In so doing, the authors argue the need for language teachers, syllabus planners and curriculum organisers to give greater attention to language as discourse.

This is the first comprehensive survey in English of research methods in the field of religious studies. It is designed to enable non-specialists and students at upper undergraduate and graduate levels to understand the variety of research methods used in the field. The aim is to create awareness of the relevant methods currently available and to stimulate an active interest in exploring unfamiliar methods, encouraging their use in research and enabling students and scholars to evaluate academic work with reference to methodological issues. A distinguished team of contributors cover a broad spectrum of topics, from research ethics, hermeneutics and interviewing, to Internet research and video-analysis. Each chapter covers practical issues and challenges, the theoretical basis of the respective method, and the way it has been used in religious studies, illustrated by case studies.

Researching Language, Gender and Sexuality leads students through the process of undertaking research in order to explore how gender and sexuality are represented and constructed through language. Drawing on international research, Sauntson incorporates a fluid understanding of genders and sexualities and includes research on a diverse range of identities. This accessible guidebook offers an outline of the practical steps and ethical guidelines involved when gathering linguistic data for the purpose of investigating gender and sexuality. Each chapter contains up-to-date information and empirical case studies that relate to a range of topics within the field of language, gender and sexuality, as well as suggestions for how students could practically research the areas covered. Student-friendly, this is essential reading for undergraduate and postgraduate students of English language, linguistics and gender studies.

The first collection to bring together well-known scholars writing from feminist perspectives within Critical Discourse Analysis. The theoretical structure of CDA is illustrated with empirical research from a range of locations (from Europe to Asia; the USA to Australasia) and domains (from parliament to the classroom; the media to the workplace).

As an interdisciplinary area of research, translation studies attracts students and scholars with a wide range of backgrounds, who then need to face the challenge of accounting for a complex object of enquiry that does not adapt itself well to traditional methods in other fields of investigation. This book addresses the needs of such scholars - whether they are students doing research at postgraduate level or more experienced researchers who want to familiarize themselves with methods outside their current field of expertise. The book promotes a discerning and critical approach to scholarly investigation by providing the reader not only with the know-how but also with insights into how new questions can be fruitfully explored through the coherent integration of different methods of research. Understanding core principles of reliability, validity and ethics is essential for any researcher no matter what methodology they adopt, and a whole chapter is therefore devoted to these issues. Research Methodologies in Translation Studies is divided into four different chapters, according to whether the research focuses on the translation product, the process of translation, the participants involved or the context in which translation takes place. An introductory chapter discusses issues of reliability, credibility, validity and ethics. The impact of our research depends not only on its quality but also on successful dissemination, and the final chapter therefore deals with what is also generally the final stage of the research process: producing a research report.
