Extending the UN Global Compact's Ten Principles into the supply chain can be difficult because of the scale and complexity of many supply chains. The UN Global Compact encourages companies to make sustainability a priority from the top of the organization. If the chief executive sees the supply chain as an extension of their workforce and community, the company can set expectations for best practices across its supply chain.

~~Supply Chain Sustainability | UN Global Compact~~
The principle for applying lean supply chain management is to maximise value for customers and profit for corporations by eliminating waste, "Muda", through each stage of commerce and implementing business strategies that enable continuous and sustainable improvement throughout the supply chain.
