Project Accounting Module - Sage Intacct | Sage UK

According to the World Bank Financial Management Manual, project financial management combines the activities of planning, budgeting, accounting, financial reporting, internal control, auditing, procurement, disbursement and the physical performance of a project with the aim of managing project resources properly, to achieve project's development objectives.

?Financial Management Information Systems: 25 Years of World Bank Experience on What Works and What Doesn't? was prepared as an updated and expanded version of the FMIS review report drafted in 2003, to highlight the achievements and challenges observed during the design and implementation of Bank funded FMIS projects since 1984.

This book tells a fascinating story on municipal finances for local government practitioners with rich examples, global practices, and good and bad experiences the authors gained in decades of field work.

This project, based on the Public Expenditure and Financial Accountability (PEFA) data set, researched how PEFA can be used to shape policy development in public financial management (PFM) and other major relevant policy areas such as anticorruption, revenue mobilization, political economy analysis, and fragile states. The report explores what shapes the PFM system in low- and middle-income countries by examining the relationship between political institutions and the quality of the PFM system. Although the report finds some evidence that multiple political parties in control of the legislature is associated with better PFM performance, the report finds the need to further refine and test the theories on the relationship between political institutions and PFM. The report addresses the question of the outcomes of PFM systems, distinguishing between fragile and nonfragile states. It finds that better PFM performance is associated with more reliable budgets in terms of expenditure composition in fragile states, but not aggregate budget credibility. Moreover, in contrast to existing studies, it finds no evidence that PFM quality matters for deficit and debt ratios, irrespective of whether a country is fragile or not. The report also explores the relationship between perceptions of corruption and PFM performance. It finds strong evidence of a relationship between better PFM performance and improvements in perceptions of corruption. It also finds that PFM reforms associated with better controls have a stronger relationship with improvements in perceptions of corruption compared to PFM reforms associated with more transparency. The last chapter looks at the relationship between PEFA indicators for revenue administration and domestic resource mobilization. It focuses on the credible use of penalties for noncompliance as a proxy for the type of political commitment required to improve tax performance. The analysis shows that countries that credibly enforce penalties for noncompliance collect more taxes on average.

This Handbook provides a comprehensive ten-step model that will help guide development practitioners through the process of designing and building a results-based monitoring and evaluation system.

The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international

development community, universities, and policy makers looking to build better evidence around what works in development.

The first two decades of the twenty-first century have witnessed an influx of innovations and reforms in public financial management. The current wave of reforms is markedly different from those in the past, owing to the sheer number of innovations, their widespread adoption, and the sense that they add up to a fundamental change in the way governments manage public money. This book takes stock of the most important innovations that have emerged over the past two decades, including fiscal responsibility legislation, fiscal rules, medium-term budget frameworks, fiscal councils, fiscal risk management techniques, performance budgeting, and accrual reporting and accounting. Not merely a handbook or manual describing practices in the field, the volume instead poses critical questions about innovations; the issues and challenges that have appeared along the way, including those associated with the global economic crisis; and how the ground can be prepared for the next generation of public financial management reforms. Watch Video of Book Launch

The World Bank Group A to Z provides the most concise and essential information about the mission, policies, procedures, products, and services of the new World Bank Group. This second edition is a follow-up to the first volume released for the 2014 Annual Meetings. The World Bank Group A to Z series builds on previous editions of A Guide to the World Bank to include features not found in its predecessors including: a graphical introduction to the World Bank Group, highlighting the Bank Group's goals, financials, regions, and results; examples and photos of Bank Group projects and programs; and tools to guide you to the information you are looking for (even if you don't know exactly what that is). It also reflects the wide-ranging reforms that have taken place within the World Bank Group in recent years, including the launch of the new World Bank Group Strategy; new approaches to development; the establishment of new Global Practice Groups and Cross Cutting Solutions Areas; and the goal of becoming a "Solutions Bank," one that will marshal the vast reserves of evidence and experiential knowledge across the five World Bank Group agencies and apply them to local problems. With more than 280 entries arranged in encyclopedic A-to-Z format, readers can easily find up-to-date information about the five agencies of the World Bank Group and the wide range of areas in which they work: from agriculture, education, energy, health, social protection and labor to gender, jobs, conflict, private sector development, trade, water and climate change. The World Bank Group's work in all of these areas now focuses on two new twin goals: eliminating extreme poverty by 2030 and boosting shared prosperity of the poorest 40 percent in every developing country.

The World Bank and IMF are placing increasing emphasis on projects aimed at improving the management of public finances. An integrated treasury system forms the backbone for recording and processing all transactions. This book provides a treasury reference model (TRM) to give guidelines for the design of automated treasury systems for governments. It provides detailed flow charts of the functional processes associated with Treasury systems. This book also includes a diagnostic questionnaire that could be used to evaluate country specific requirements as well as a set of sample functional specifications that could be used for procurement and/or development of the application software that would be required to implement these systems.
