Radio Row had been the hub of the electronics industry in New York since the 1920s. When it died, its remnants scattered to other areas of Manhattan, another unique slice of New York's heritage perished, too. "People came from everywhere to buy electronics (there)," said Vickie Ploscowe. As a young woman, Ploscowe would accompany her father ...

The Death of New York's Radio Row

ALTERNATIVE: Using headers and crimp pins is the easiest way to connect wires to the Arduino - basically buy an Arduino with headers pre-soldered, then crimp the pins into the sensor wires, insert the pins into the connector and slot the connector onto the Arduino. It's really simple! But for those who want a really really small build, sensor wires can be soldered directly to an Arduino, saving ...

In the shadow of the World Trade Center site in NYC was once a thriving 13-block small business stronghold known as Radio Row that is now lost.

The Lost Neighborhood of Radio Row at NYC's World Trade ...

New York City Construction and existence. New York City's Radio Row, which existed from 1921 to 1966, was a warehouse district on the Lower West Side of Manhattan, New York City. Major firms that started there include Arrow Electronics, Avnet (founded by Charles Avnet in 1921), and Schweber Electronics.. The first of many radio-related stores was City Radio, opened in 1921 by Harry Schneck on ...

Radio Row - Wikipedia

You can think of this example as a one-row matrix. Now what we need to do is extend it with more rows. If we can share one input pin between a whole row of switches, we can also share each of the outputs between a whole column under the condition that each of the switches in a column is connected to a different input.

How to make a keyboard – the matrix | komar's techblog
