Originally published in 1993. This study was written in 1946 having been commissioned by a large corporation in the food industry. The insights from this agricultural economics perspective even now are highly interesting. At the time there was real concern over food shortage and the UN and US government assumed there would be a problem for a long time to come. This study showed otherwise and set out suggestions for food policy and foreign aid policy with regards to food. This thorough study is an exemplary snapshot of the history of food policy and has lessons still to share.

""The report is essential reading for policy makers, government workers, and academics pursuing the goal of equitable, sustainable development across the world."" - N. R. Narayana Murthy, Chairman and Chief Mentor Infosys Technologies Ltd. Information and communication technology (ICT) is rapidly evolving, changing rich and poor societies alike. It has become a powerful tool for participating in the global economy and for offering new opportunities for development efforts. ICT can and should advance economic growth and reduce poverty in developing countries. It has been 20 years since the first telephone operator was privatized, a little over 10 since the World Wide Web emerged, and 5 since the telecommunications bubble burst. How have the ICT sector and its role in development evolved? What have we learned? How can we move forward? Information and Communications for Development 2006: Global Trends and Policies contains lessons from both developed and developing countries. It examines the roles of the public and private sectors, identifying the challenges and the benefits of adopting and expanding ICT use. The report assesses topics essential to building an information society, including investment, access, diffusion, and country policies and strategies. Assessing what has worked, what hasn't, and why, this report is an invaluable guide for understanding how to capture the benefits of ICT around the world."

After entering an ancient chamber on an archaeological dig, Cloe Kingsley is sent back in time to the year 1452 B.C. to the Egyptian court of Hatshepsut and into the body of a corrupt priestess, where she is now forced to face her new environment and the challenges it holds. A first novel.

Written by major contributors to the field who are well known within the community, this is the first comprehensive summary of the many results generated by this approach to quantum optics to date. As such, the book analyses selected topics of quantum optics, focusing on atom-field interactions from a group-theoretical perspective, while discussing the principal quantum optics models using algebraic language. The overall result is a clear demonstration of the advantages of applying algebraic methods to quantum optics problems, illustrated by a number of end-of-chapter problems. An invaluable source for atomic physicists, graduates and students in physics.

Aimed at a wide audience of readers, *The Anthropology of Catholicism* is the first companion guide to this burgeoning field within the anthropology of Christianity. Bringing to light Catholicism's long but comparatively ignored presence within the discipline of anthropology, the book introduces readers to key studies in the field, as well as to current analyses on the present and possible futures of Catholicism globally. This reader provides both ethnographic material and theoretical reflections on Catholicism around the world, demonstrating how a revised anthropology of Catholicism can generate new insights and analytical frameworks that will impact anthropology as well as other disciplines.

What can nurses do to support those receiving palliative care? How do you ensure clear communication and maintain patients' and families' preferences? *Palliative Care Nursing* is essential reading for nursing students, nurses and other health and social care professionals providing supportive and palliative care to those with advanced illness or who are towards the end of life. This third edition of the acclaimed textbook has been extensively revised and examines important research studies, key debates around care and strategies to move palliative care nursing forward. In four sections the book covers key elements of nursing practice towards the end of life: • Who is the palliative care patient? • Providing palliative nursing care • Caring around the time of death • Challenging issues in palliative care nursing. Leading authors in each of these fields address contemporary issues and explore how to provide high quality person-centred palliative care, encouraging application to practice through exercises case studies. Chapters completely reworked or new for this edition include those on communication, living with uncertainty, bereavement care, the costs of caring, nurses' decision-making and capacity, and palliative care worldwide. The clarity of evidence presented and coverage of a diverse range of topics make this the foundational textbook for all studying palliative care at pre-registration level, postgraduate level or as part of CPD study. With a foreword by last edition editor, Professor Sheila Payne, Lancaster University, UK. "I welcome this third edition of *Palliative Care Nursing* and congratulations to the new team who have provided us with a dynamic and innovative development of a core text for palliative nursing practice. As the largest workforce in palliative care, and given the changing face of clinical practice for nurses, including increased educational opportunity and expanding roles and responsibilities, this book is timely in its focus on critical issues which frame and scope the reality of palliative care and the nursing contribution to that discipline. The learning exercises, in particular, offer tools for educators and clinicians to reflect on practice and understand new ways of knowing in palliative care. It will be an excellent resource for nursing, both in the UK and Ireland and to the wider international audience, having drawn on the breadth of global nursing expertise to bring this book together. Philip Larkin, Professor of Clinical Nursing (Palliative Care), University College Dublin and Our Lady's Hospice and Care Services, Dublin, Ireland; President, European Association for Palliative Care "This is a book of substance that captures the current status of palliative nursing, including the values and research evidence that underpin it. The changing nature of palliative nursing as an evidence-based specialism is balanced with practical skills and insights from experts, and also considers the

needs of those working with, or concerned about, the dying person's well-being. It covers a range of challenging issues as well as drawing on the wisdom of those who actually undertake this work on a daily basis. I hope that students and practitioners from all disciplines will find this a useful resource to understand the art and craft of good palliative nursing." Professor Daniel Kelly, Fellow of the Royal College of Nursing and Royal College of Nursing Chair of Nursing Research, Cardiff University, UK

Leadership in the early years is about using your knowledge, skills, personality and experience to positively influence practice. Every practitioner has the capacity to lead, and in doing so, improve opportunities for children and their families. Examining the various roles of early years practitioners, and the everyday challenges and opportunities they face, this book promotes leadership of early childhood practice by considering the following; · Who the leaders are, and what skills they require · The variety of ways a practitioner can lead within a setting · Key roles including the team leader and the key person · How to develop a culture of leadership · The importance of working with families and other professionals · Improving leading through reflective practice. Whether you are a room leader in an early childhood setting needing support in your leadership skills, a manager of an early childhood business, a leader of a nursery, a leader of practice or studying to become an early years practitioner this book is ideal for helping you improve your leadership skills.
