Micro Saint Sharp is a general purpose, discrete-event simulation software tool. Micro Saint Sharp's intuitive graphical user interface and flow chart approach to modeling make it a tool that can be used by generalists as well as simulation experts. Micro Saint Sharp has proven to be an invaluable asset in both small businesses and Fortune 500 companies and in many areas including the military, human factors, health care, manufacturing, and the service industry. The user manual has been updated for software version 3.8. Some new features are the ability to add swim lanes to any network background, data exchange capability with the UML/SysML tool MagicDraw, and a updated version of the built-in OptQuest optimization.

Revised edition of Webster's standard American style manual, 1985.

The Design Manual by David Whitbread is an indispensable and comprehensive reference for traditional and digital publishing. From beginners to professional graphic designers, desktop publishers and graphic design students, The Design Manual provides essential information on conceptual approaches, planning and project development techniques for print, web and multimedia production. Design tasks are divided into sections on publication, corporate identity, on-screen and advertising design. There is discussion of specific skills such as branding and logo design; stationery, catalogue, annual report and newsletter production; websites; storyboarding and animation techniques; and more. The production section discusses layout and typography for print and screen, colour and colour systems, printing and finishing processes. With numerous checklists and practical tips throughout the text, The Design Manual has become a standard reference for anyone involved in or interested in design.
