Plunkett's Telecommunications Industry Almanac 2008 is the only complete reference guide to the telecommunications technologies and companies that are changing the way the world communicates today. This massive reference book's market research section provides complete access to the U.S. telecommunications and communications industry. This section includes over a dozen major statistical tables covering everything from revenues for the fixed line and wireless service sectors, to the number of telephone subscribers worldwide, to telephone equipment import and export market numbers. Finally, in this carefully-researched volume, you will receive an abundance of data on: national and global telecommunications statistics, new telecommunications technology, telecommunications market forecasts, telecommunications trends and leading telecommunications companies. In the corporate profiles section, you'll receive vital details on the "Telecommunications 500 Firms," the largest, most successful corporations in all facets of the telecommunications business. These in-depth profiles include corporate name, address, phone, fax, web site, growth plans, competitive advantage, financial histories and up to 27 executive contacts by title. You will also find information regarding local exchange and long distance telephone service markets and trends, wireless and cellular telephone markets and trends, satellite telecommunications, Wi-Fi, telephone industry equipment, software and support. Telecommunications is one of the fastest-growing and most dynamic industries in the world today, and Plunkett's Telecommunications Industry Almanac will be your guide to this rapidly-changing business. Purchasers of the printed book or PDF version may receive a free CD-ROM database of the corporate profiles, enabling export of vital corporate data for mail merge and other uses.

The cell phone is the fastest-selling consumer electronic in the world. On a global basis, over 800 million cellular telephones are sold yearly. More camera-equipped cell phones are sold each year than stand alone digital cameras. Rapid development of new technologies is leading to ever more versatile, multipurpose mobile devices, including 3G Internet-enabled cell phones and PDAs. Meanwhile, wireless networking and wireless Internet access are developing and expanding on a global basis at a rapid rate. Booming technologies include such 802.11 standards as Wi-Fi and WiMax, as well as Ultra Wide Band (UWB) and Bluetooth. Telematics, intelligent transportation systems (ITS) and satellite radio will soon create an entertainment, navigation and communications revolution within automobiles and trucks. Meanwhile, RFID (radio frequency identification) will revolutionize wireless tracking, inventory and logistics at all levels, from manufacturing to shipping to retailing. These developments are creating challenges for legacy companies and opportunities for nimble marketers and managers. Plunkett's Wireless, Wi-Fi, RFID & Cellular Industry Almanac 2008 covers such sectors. Our coverage includes business trends analysis and industry statistics. We also include a wireless and cellular business glossary and a listing of industry contacts, such as industry associations and government agencies. Next, we profile hundreds of leading companies. Our 350 company profiles include complete business descriptions and up to 27 executives by name and title.

This proceedings volume brings together some 189 peer-reviewed papers presented at the International Conference on Information Technology and Computer Application Engineering, held 27-28 August 2013, in Hong Kong, China. Specific topics under consideration include Control, Robotics, and Automation, Information Technology, Intelligent Computing and Telecommunication, Computer Science and Engineering, Computer Education and Application and other related topics. This book provides readers a state-of-the-art survey of recent innovations and research worldwide in Information Technology and Computer Application Engineering, in so-doing furthering the development and growth of these research fields, strengthening international academic cooperation and communication, and promoting the fruitful exchange of research ideas. This volume will be of interest to professionals and academics alike, serving as a broad overview of the latest advances in the dynamic field of Information Technology and Computer Application Engineering.

Integrated Business Communication applies communication concepts and issues from various fields such as marketing, public relations, management, and organizational communication and packages them into a dynamic new approach – Integrated Communication. It is designed to give business students a basic knowledge and broad overview of communication practices in the workplace. Ultimately, the book should be seen as a practical guide to help students understand that communication is key to decision making and fundamental to success in a global marketplace. This book uses an interdisciplinary approach to its discussion of integrated communication by incorporating theory, application, and case studies to demonstrate various concepts. Theory will be introduced when necessary to the understanding of the practical application of the various concepts. This co-authored book will be broad enough in scope and method to be used as a core text in business communication. Case studies will be an integral part of the material. The book focuses on the practical application of theory and concepts Presents case studies from many sectors to illustrate concepts The book will have an interdisciplinary approach utilizing examples from communications, mass communications, marketing, public relations, management, and intercultural and organizational communication being used in many countries throughout the world There will be a strong pedagogical structure within the text with a website providing additional materials for students and lecturers Contributions from Katherine Van Wormer, Theresa Thao Pham, Charles Lankester, Elizabeth Dougall, Jean Watin-Augouard, Kristi LeBlanc, Geof Cox

Presents a market research guide to the telecommunications industry - a tool for strategic planning, competitive intelligence or financial research. This title includes a chapter of trends, statistical tables, and an industry-specific glossary. It provides profiles of the 500 companies in various facets of the telecommunications industry.
