cooking since these fuels exceed its emission rate targets. The 'clean fuels' is recommends include biogas, ethanol, LPG, natural gas and electricity.

## ~~Indoor Air Pollution — Our World in Data~~

Indoor air pollution, the degradation of indoor air quality by harmful chemicals and other materials, can be up to 10 times worse than outdoor air pollution [source: Dunn]. This is because contained areas enable potential pollutants to build up more than open spaces do.

## ~~How Indoor Air Pollution Works +~~

### ~~HowStuffWorks~~

Noise Levels: An air purifier combats indoor air pollution and transforms the living space by reducing the number of pollutants and irritants. Hence, the air purifier would be running continuously for an effective air cleaning process.

## ~~Air Purifiers: Solution To Indoor Air Pollution~~

Poor indoor air quality has been linked to lung diseases like asthma, COPD and lung cancer. Indoor air pollution is dust, dirt or gases in the air inside a building such as your home or workplace that harms us if we breathe it in. Types of air pollution include: particulate matter (PM) - microscopic particles of dust and dirt in the air

## ~~Indoor air pollution | British Lung Foundation~~

In urban areas, a significant proportion of indoor air pollution is due to outdoor air pollution that penetrates through the buildings. As modern buildings have become more efficient and airtight, so has the potential for poor air quality. Shutting the windows in an office may help to prevent heat escaping or particulate matter from vehicles from getting in, but it also has the negative side effect of trapping respired CO<sub>2</sub> produced by the office's occupants.

## ~~Indoor Air Quality Management — AirLabs~~

Indoor air pollution can be a serious and potentially deadly problem. But by taking a few simple steps you can reduce your risk and improve the quality of the air in your home. Test your home for radon in your air and water, and if necessary install an appropriate radon mitigation system.

## ~~Indoor air pollution: How to protect yourself and your ...~~

Ventilation and shading can help control indoor temperatures. Ventilation also helps remove or dilute indoor airborne pollutants coming from indoor sources. This reduces the level of contaminants and improves indoor air quality (IAQ).
