A 16-week strength training plan for marathon runners

For most runners, the largest benefit of strength training is a reduction in running injuries. With stronger muscles, connective tissues, joints, and more resilience to fatigue, you'll get hurt less often. Instead of sitting on the sidelines, you can enjoy running. Tired of getting hurt?

The Best Strength Exercises for Runners | Strength Running

The best rule of thumb when it comes to strength training for distance runners, and running injuries, in general, is not to push through the pain. The vast majority of running injuries will get worse over time if you try to run through the pain, rather than better.

Strength Training for Distance Runners - Ultimate Guide ...

Focused strength training can help runners improve their overall speed and pace. Having stronger glutes, calves, hamstrings, and even back and arm muscles can give runners the ability to generate more power, increasing speed. Having stronger muscle fibers and groups can also help runners maintain better form for a longer period of time.

- Metcons & Miles
