The salient features of the present edition are: All the Problems and Solutions have been thoroughly revised in the light of up-to-date amendments in Income tax Law and Rules for Assessment Year 2020-21. Almost all numerical questions given at the end of the chapters of the authors' other publications on Income-tax (viz., Income-tax Law and Accounts, Aaykar Vidhan evam Lekhe, Law and Practice of Income-tax) have been solved in this book and the number printed within brackets at the end of the questions in other publications is the problem number of this book. The selection and sequence of the questions are well planned and systematic so as to cover all ticklish points within a reasonable number of questions. Wherever needed, detailed explanatory notes have been given at the end of solutions. Candidates preparing for C.A., Company Secretaries, Cost and Works Accountants, and Income-tax Departmental Examinations, will, particularly, find the book very useful. It will also be useful for candidates preparing for B.Com. and M.Com. Examinations of various Indian Universities.

This book determines the specific features of socio-economic transformations of various spheres of the national economy with a focus on the financial system. It considers the development of industrial holdings in the electric energy sphere and also studies the influence of technology on fish farming in modern Russia. The global factors of using digital technologies at the municipal level during creation of "green" and "smart" cities are analyzed. The perspectives of development of tourism in the digital economy from the positions of supply and demand are determined. The specifics of development of agricultural production in the age of digital transformations by the example of modern Russia are outlined, and "smart" agricultural platform, which allows for multiple increase of the agro-industrial complex's efficiency, is developed. New possibilities and need in reformation of the international monetary system in the conditions of the Fourth industrial revolution are determined. The problems and perspectives of development of Eurasian stock markets in the modern economic conditions under the influence of wide distribution of digital technologies are systematized. Specific features of the evolution of the forms of money – from gold to crypto currencies are – are distinguished. Specific features of benchmarking of depreciation of currencies (inflation) under the influence of globalization and regionalization of the international monetary system are determined. The authors present a concept of the banking system of the future in the conditions of macro-economic instability, which stimulates financial crisis management of the national economy, and determine the role of banks in aggregation and redistribution of monetary resources in economy in the context of digital transformations. Also, attention is paid to social consequences of digital modernization of the financial system – transformation of human's social life in the age of innovative banking is shown. Effectiveness of online banking, as a new form of payments that is popular in the digital economy, is analyzed. The authors formulate competencies that employees of banks of the future, which will function in the digital economy, should have and study the perspectives of digitization of the practice of tax administration based on technological processing and analytics of Big Data by the example of experience of modern Russia, as well as related transformation processes in the existing practice of the tax system organization. A concept of organization and management of the national tax system in the conditions of robotization of production and consumption is developed, and the role of blockchain technologies in improvement of the modern Russian tax system is determined. The investment platform for the modern digital economy is offered. As a result, the scientific paradigm of formation of the digital financial system in the conditions of Industry 4.0 is formed.

This is a story about the American financier and PR genius, Bill Browder. In the 1990s and through the 2000s, Bill Browder built the largest foreign investment fund in Russia. He was a keen fan of Russia's president Vladimir Putin, until several tax issues, a ban from Russia and a dead tax advisor changed all that. For more than a decade, Bill Browder has pushed the story of his dead "lawyer" Sergei Magnitsky worldwide; a story, which is distorted at best, at worst entirely false. With huge fanfare, he has created a US human rights law in the name of his dead tax advisor. Bill Browder has been a central figure in the worldwide stories about laundering of Russian money, which have been filling pages in the Western media for almost 10 years. Those stories have had major repercussions in the financial industry - including in the Nordic countries - and have made the prevention of Russian money laundering a top priority in the Western world. Bill Browder's story is a sensational tale of lies, murder, billionaires and the manipulation of Western media by a single man who loudly claims to be "Putin's enemy No. 1". At the time of publication, Browder has become a vocal advocate of an aggressive and uncompromising stance towards Moscow, and is playing a central role in the new cold war between Russia and the West.
