After an initial field study of the performance and durability of brick veneer/steel stud wall systems (BV/SS), CMHC commissioned a series of building science experiments and theoretical studies to see how deficiencies observed in the field could be avoided in future BV/SS designs. This guide summarizes the findings of several of these projects and shows how to apply the results. Subjects dealt with in the guide include: rain penetration control; condensation control; thermal bridging; construction sequencing; quality control; testing and commissioning; and maintenance and repair. Construction details (in DWG and DXF format) and the master specifications for lateral loadbearing steel studs (in WordPerfect 5 and ASCII 1 text) are provided on diskette and can be copied and modified for project use. Measurements are provided in both metric and imperial versions.

In the jungle the mighty jungle, The lion sleeps tonight. Hush my darling, don't fear my darling, The lion sleeps tonight...

Here is the love story of a beautiful Irish girl who rode horses like an Arizona cowboy, whose hair was red as flame, and whose lover was an English gentleman. But then, there was the Spaniard, too! Hot-headed, he was, passionate and lawless as a Tartar. Needless to say the story takes some startling turns. The end is surprising. And the satisfying conclusion it all comes to is this, that the eternal feminine still responds to courage in the male.

Appendices A-H, supporting An Economic Commentary on Exodus In Appendix A, "The Reconstruction of Egypt's Chronology," Dr. North breaks with the traditional textbook chronology of Egypt and uses a combination of reconstructions, most importantly Donovan Courville's 1971 book, The Exodus Problem and Its Ramifications. He also used the article he persuaded Courville to write for The Journal of Christian Reconstruction, which he edited. Courville relied on Immanuel Velikovsky's shortened chronology. Warning: if you don't know when an event happened, you can't know how it happened. Appendix B, "The Demographics of Decline," is a study of the zero population growth movement. Appendix C, "The Labyrinth and the Garden," is a study of certain ancient symbols, including the non-Nazi swastika, which goes back for many centuries. Appendix D, "The Rule of Law and the Free Market," discusses the crucial concept of the rule of law, which is derived from Exodus 12:48-49. This principle makes the free market possible. North discusses F. A. Hayek's writings on this topic. Appendix E, "The Economic Implications of the Sabbath," is a study of why it is impossible in the modern world to have everyone cease working on the same day. Appendix F, "Timing the Lord's Day," investigates the hour that the day should begin: sunset, midnight, or sunrise. Appendix G, "Macaulay on Democracy," reprints Thomas Macaulay's letter to an American on why he did not think the Constitution would restrict the rise of the modern welfare state. He wrote it in 1857. Appendix H, "The Epistemological Problem of Social Cost," is an essay on how modern economics has not offered a theoretical case for any kind of government economic policy. If economists were intellectually honest, they would not make policy recommendations. Gary North regards this as one of his Big 3 essays, along with Appendices A and C in his commentary on Genesis, Sovereignty and Dominion. He rewrote this essay slightly to become the book, The Coase Theorem (1991). In that year, Coase won the Nobel Prize in economics. ----- This series, An Economic Commentary on the Bible, is published by Reconstructionist Radio, a producer and provider of Reformed (Postmillennial, Presuppositional, Covenantal, Calvinist, and Theonomic) Christian Reconstructionist podcasts, audiobooks, lectures, sermons, music, and other media. Content is made available from authors such as Gary North (Institute for Christian Economics, Point Five Press), David Chilton, R.J. Rushdoony (Chalcedon Foundation), Joel McDurmon, Phil Kayser (Biblical Blueprints), Greg Bahnsen (Covenant Media Foundation), Stephen Perks (Kuyper Foundation), Bojidar Marinov (Christendom Restored, Bulgarian Reformation), and many more.

"A member of the International Code Family"--Cover.

Having a safe room built for your home or small business can help provide near-absolute protection for you and your family or employees from injury or death caused by the dangerous forces of extreme winds such as tornadoes, hurricanes, and other extreme weather conditions. Now available in its fourth edition, "Taking Shelter from the Storm," helps home or small business owners assess their risk and determine the best type of safe room for their needs. Includes safe room designs and shows you and your builder/contractor or local design professional how to construct a safe room for your home or small business. Design options include safe rooms located inside or outside of a new home or small business. Small business owners, especially construction contractors, home and office builders, construction builders, home designers, architects, and citizens that want to protect their homes or offices during extreme weather conditions may be interested in this reference work.
