The Archaeology of Cremation: Burned Human Remains in ...

For many years, the study of cremated bone has been seen as less important and worthwhile than the study of unburned human remains. Williams (2008), in the excellent Schmidt and Symes edited volume The Analysis of Burned Human Remains, has argued that human remains from cremation contexts were viewed as being peripheral to other less fragmented bodies, such as unburned remains, mummies and bog bodies.

Equally, the archaeology of cremation is much broader than the analysis of burned bones. The landscapes, spaces, monuments, contexts, artefacts and bones associated with cremation practices need to be integrated into theorized interpretations of social structure, symbolism, power, personhood and social memory.
