Office 365 apps support the pen interface here, too. You can write and draw directly onto Word, Excel or PowerPoint documents, and immediately share those notes with others thanks to co-authoring. Of course, this deeply-integrated approach to going paperless works best if the investment is at an organisational level.

~~Turning over a new leaf: Going paperless with Office 365 ...~~

A paperless office is a work environment in which the use of paper is eliminated or greatly reduced. This is done by converting documents and other papers into digital form, a process known as digitization. Proponents claim that "going paperless" can save money, boost productivity, save space, make documentation and information sharing easier, keep personal information more secure, and help the environment. The concept can be extended to communications outside the office as well.
