That point is the planet Venus, a planet so bright and luminous that it outshines all other objects in the night sky except for the Moon. Every other star and planet pales in comparison to Venus as ...

This Is Why Venus Is The Brightest, Most Extreme Planet We Can See

Anyone who spends their days working to address the climate crisis, as I do, hears this question again and again: What can I do? On the one hand, the question brings me joy: so many people want to ...

The Climate Crisis Is a Call to Action. These 5 Steps Helped Me Figure Out How to Be of Use

The European Space Agency (ESA) and Japan Aerospace Exploration Agency (JAXA) have unveiled the probe they're sending to study Mercury in 2018, tasked with figuring out why the smallest planet ...

We're Sending Another Probe to Mercury to Work Out Why The Planet's Shrinking

Here's what seems like a weird question: Why do we orbit a star like the Sun instead of a red dwarf? One way to resolve this is to just assume we're outliers; most habitable (and possibly inhabited) ...

The Red Sky Paradox: Why do we orbit a star like the Sun instead of a red dwarf?

The reason bigger objects in space are round and smaller ones aren't boils down to gravity. And it's the same reason mountains on Earth can only grow to a certain height ...

I've always wondered: why are the stars, planets and moons round, when comets and asteroids aren't?

Not just billionaires but private companies and a growing number of nations are, somewhat abruptly, competing to get into space.

The Race to Leave Planet Earth

The only Planet in the Universe with living beings, including animal and plant life is the Planet Earth. Can we transform it to a Utopia, more or less, a Paradise. Yes, we can. Why not? If all Nations ...

Can We Make the Planet Earth a Utopia? Yes: Why Not?

What if we could not only harness the power of the sun, but actually use it to run the entire planet? Concentrated solar power (CSP) has the potential to do just that □ using arrays of revolving ...

How concentrated solar power could fuel the future

Planet Home Trilogy

I used to go mad at the amount of time my son spent in his room playing computer games, but he is much more likely to survive his childhood playing Hearts of Iron IV than climbing on dangerous garage ...

Our teenagers grow up with us tapping on little rectangles □ why should we expect them to behave differently?

In one of his classes, he spoke about the challenging path writers face and the importance of developing a personal writing ideology. He said that writers need to figure out exactly why it is they ...

Jamie O'Connell: why the world needs writers

And we're headed there soon ... the reason for our return to Venus comes down to understanding why the planet "is our sibling and not our twin." "How is it that you have a planet that ...

Why Venus Is Soon to Be the Most Exciting Place in the Solar System

Beast/Photo by Scott Olson/GettyHow could so many Americans believe in "the Big Lie?" We see the numbers and we shake our heads. Poll after poll shows that one third of all of us believe the 2020 ...

We Still Won't Admit Why So Many People Believe the Big Lie

Israeli software company NICE talks about how to prevent "robot anxiety", crime, and techno abuse. But can its plan work?

The five laws of robotic software automation

Super hero movies are all the rage, but what if I told you there's a 14-year-old with Guinness world records and championship spelling skills, Baltimore Sun columnist Peter Jensen asks.

Opinion: A real superhero walks among us in Zaila Avant-garde. Why do the fake ones get all the love?

Venus is close to Earth in size, composition and distance to the sun. But carbon dioxide has turned it into a "vision of hell". Photograph: AP With a surface hot enough to melt lead, Venus has ...

Why science can't resist the allure of Venus: new missions to Earth's nearest planetary neighbour

The microbiologist who directs the National Emerging Infectious Diseases Laboratories at Boston University explains all the biosafety precautions in place that help him feel safer in the lab than out.

We work with dangerous pathogens in a downtown Boston biocontainment lab - here's why you can feel safe about our research
