Social entrepreneurship is an approach by individuals, groups, start-up companies or entrepreneurs, in which they develop, fund and implement solutions to social, cultural, or environmental issues. This concept may be applied to a wide range of organizations, which vary in size, aims, and beliefs. For-profit entrepreneurs typically measure performance using business metrics like profit, revenues and increases in stock prices. Social entrepreneurs, however, are either non-profits, or they blend f

A no-nonsense, implementable handbook for taking part in the Entrepreneur Revolution We are living in revolutionary times; times with an impact as significant and far-reaching as the previous Industrial Revolution was to the Agricultural Age. Technological shifts have allowed micro-businesses to compete with large corporations. Small business can now have a global footprint, can be structured in low tax environments, move products anywhere in the world, and access unprecedented levels of support. Entrepreneur Revolution means taking the initiative to do something that you love, something that you're good at, and something that will make you money. This masterclass in gaining an entrepreneurial mindset will show how to change the way you think, the way you network, and the way you make a living. Includes new statistics, activities, case studies, and research Takes a look at how the brain can affect the entrepreneurial mindset Offers new ideas for entrepreneurs starting a new business Helps you shake off old ideas and make a great, independent leap forward This inspiring and practical book shows you how to break free from The Industrial Revolution mindset, quit working so hard, follow your dream—and make a fortune along the way.

An expert's inside look into the ways social entrepreneurship is changing the world Whether you're a policymaker, investor, or involved in a nonprofit, Social Entrepreneurship for the 21st Century gives you the knowledge you need to make the best possible decisions for the future. A former McKinsey consultant reveals how social entrepreneurship has filtered into the workings of government and private enterprise, where social sector values are now shaping "social impact" capitalism. Georgia Levenson Keohane is a Roosevelt Institute fellow, foundation executive, and former McKinsey consultant. She advises a range of poverty-fighting organizations, including philanthropies (Robin Hood Foundation), educational entities (New York City Charter School Center), community development organizations (Civic Builders), and think tanks (The Aspen Institute). She is an adjunct Professor at Columbia Business School.

Contemporary Western societies seem to be marked by a revival of ethics: virtually every actor claims to be doing something "good", or even to be willing to 'change the world'. Social innovation, sharing economy and ethical business are just few of the tags attached to this manifold cultural trend, which is indicative of the attempt to reintegrate ethical responsibility with economic conduct. But how can entrepreneurship be redefined as the best way to express one's will to change society? How can people decide to actualise their desire to change how things are by means of a business? Social Entrepreneurship and Neoliberalism: Making Money While Doing Good tackles these questions, offering a critical yet empathetic account of the lifeworld of young social entrepreneurs in London and Milan.

Despite the world's elation at the Arab Spring, shockingly little has changed politically in the Middle East; even frontiers Egypt and Tunisia continue to suffer repression, fixed elections, and bombings, while Syria descends into civil war. But in the midst of it all, a quieter revolution has begun to emerge, one that might ultimately do more to change the face of the region: entrepreneurship. As a seasoned angel investor in emerging markets, Christopher M. Schroeder was curious but skeptical about the future of investing in the Arab world. Travelling to Dubai, Cairo, Amman, Beirut, Istanbul, and even Damascus, he saw thousands of talented, successful, and intrepid entrepreneurs, all willing to face cultural, legal, and societal impediments inherent to their worlds. Equally important, he saw major private equity firms, venture capitalists, and tech companies like Google, Intel, Cisco, Yahoo, LinkedIn, and PayPal making significant bets, despite the uncertainty in the region. With Startup Rising, he marries his own observations with the predictions of these tech giants to offer a surprising and timely look at the second stealth revolution in the Middle East—one that promises to reinvent it as a center of innovation and progress.

Who drives transformation in society? How do they do it? In this compelling book, strategy gurn Roger L. Martin and Skoll Foundation President and CEO Sally R. Osberg describe how social entrepreneurs target systems that exist in a stable but unjust equilibrium and transform them into entirely new, superior, and sustainable equilibria. All of these leaders—call them disrupters, visionaries, or changemakers—develop, build, and scale their solutions in ways that bring about the truly revolutionary change that makes the world a fairer and better place. The book begins with a probing and useful theory of social entrepreneurship, moving through history to illuminate what it is, how it works, and the nature of its role in modern society. The authors then set out a framework for understanding how successful social entrepreneurs actually go about producing transformative change. There are four key stages: understanding the world; envisioning a new future; building a model for change; and scaling the solution. With both depth and nuance, Martin and Osberg offer rich examples and personal stories and share lessons and tools invaluable to anyone who aspires to drive positive change, whatever the context. Getting Beyond Better sets forth a bold new framework, demonstrating how and why meaningful change actually happens in the world and providing concrete lessons and a practical model for businesses, policymakers, civil society organizations, and individuals who seek to transform our world for good.

Presenting rigorous and original research, this volume offers key insights into the historical, cultural, social, economic and political forces at play in the creation of world-class ICT innovations in Kenya. Following the arrival of fiber-optic cables in 2009, Digital Kenya examines why the initial entrepreneurial spirit and digital revolution has begun to falter despite support from motivated entrepreneurs, international investors, policy experts and others. Written by engaged scholars and professionals in the field, the book offers 15 eye-opening chapters and 14 one-on-one conversations with entrepreneurs and investors to ask why establishing ICT start-ups on a continental and global scale remains a challenge on the "Silicon Savannah". The authors present evidence-based recommendations to help Kenya to continue producing globally impactful ICT innovations that improve the lives of those still waiting on the side-lines, and to inspire other nations to do the same.

In a book presented in a Q-and-A format, the authors explain what social entrepreneurs are, how their organizations function, what challenges they face and how readers can get involved in the efforts that social entrepreneurs are spearheading. The Definitive Guide to Doing Business in Africa For global and Africa-based companies looking to access new growth markets, Africa offers exciting opportunities to build large, profitable businesses. Its population is young, fast-growing, and increasingly urbanized—while rapid technology adoption makes the continent a fertile arena for innovation. But Africa's business environment remains poorly understood; it's known to many executives in the West only by its reputation for complexity, conflict, and corruption. Africa's Business Revolution provides the inside story on business in Africa and its future growth prospects and helps executives understand and seize the opportunities for building profitable, sustainable enterprises. From senior leaders in McKinsey's African offices and a leading executive on the continent, this book draws on in-depth proprietary research by the McKinsey Global Institute as well as McKinsey's extensive experience advising corporate and government leaders across Africa. Brimming with company case studies and exclusive interviews with some of Africa's most prominent executives, this book comes to life with the vibrant stories of those who have navigated the many twists and turns on the road to building successful businesses on the continent. Combining an unrivalled fact base with expert advice on shaping and executing an Africa growth strategy, this book is required reading for global business executives looking to expand their existing operations in Africa—and for those seeking a road map to access this vast, untapped market for the first time.

With business seemingly everywhere on television, from the risks of the retail and restaurant trade to pitching for investment or competing to become the next 'apprentice', The Television Entrepreneurs draws upon popular business-oriented shows such as The Apprentice and Dragons' Den to explore the relationship between television and business. Based on extensive interviews with key industry and business figures and drawing on new empirical research into audience perceptions of business, this book examines our changing relationship with entrepreneurship and the role played by television in shaping our understanding of the world of business. The book identifies the key structural shifts in both the television industry and the wider economy that account for these changing representations, whilst examining the extent to which television's developing interest in business and entrepreneurial issues is simply a response to wider social and economic change in society. Does a more commercial and competitive television marketplace, for instance, mean that the medium itself, through a particular focus on drama, entertainment and performance, now plays a key role in re-defining how society frames its engagements with business, finance, entrepreneurship, risk and wealth creation? Mapping the narratives of entrepreneurship constructed by television and analysing the context that produces them, The Television Entrepreneurs investigates how the television audience engages with such programmes and the possible impact these may have on public understanding of the nature of business.
