The light-duty vehicle fleet is expected to undergo substantial technological changes over the next several decades. New powertrain designs, alternative fuels, advanced materials and significant changes to the vehicle body are being driven by increasingly stringent fuel economy and greenhouse gas emission standards. By the end of the next decade, cars and light-duty trucks will be more fuel efficient, weigh less, emit less air pollutants, have more safety features, and will be more expensive to purchase relative to current vehicles. Though the

Buddhist concepts and practices in Patanjala yoga. Karen O'Brien-Kop demonstrates that 'classical yoga' was co-constructed systemically by both Hindu and Buddhist thinkers who were drawing on the same conceptual metaphors of the period. This analysis demystifies early yoga-meditation as a timeless 'classical' practice and locates it in a specific material context of agrarian and urban economies.
