Using everyday, easy-to-grasp examples to reinforce basic concepts, this highly regarded handbook remains the standard introduction to meteorology and the atmosphere - components, problems, and applications. Includes the most up-to-date coverage of topics such as: ozone depletion, the ultraviolet index, temperature, dew point temperature and orographic effects, wildfires and weather, thunderstorms and lightning, the record-breaking Florida hurricane season, effects of air pollution, and more. Incorporates top-quality visuals, including new satellite images and illustrations by the award-winning Dennis Tasa, to demonstrate the highly visual nature of meteorology. Uses a largely non-technical writing style to help readers grasp important concepts. For those interested in learning more about meteorology.
