TypeScript Design Patterns - Free TypeScript eBooks in PDF

in TypeScript. Strategy is a behavioral design pattern that turns a set of behaviors into objects and makes them interchangeable inside original context object. The original object, called context, holds a reference to a strategy object and delegates it executing the behavior. In order to change the way the context performs its work, other objects may replace the currently linked strategy object with another one.

Design Patterns: Strategy in TypeScript

Pattern matching in Typescript.. Pattern Matching is a declarative much more powerful and less verbose alternative to imperatives "if/else" conditions. A definition can be found inside Scala Documentation " Pattern matching tests whether a given value (or sequence of values) has the shape defined by a pattern, and, if it does, binds the variables in the pattern to the corresponding components ...
