A solution is a homogeneous mixture of one or more solutes dissolved in a solvent. solvent : the substance in which a solute dissolves to produce a homogeneous mixture solute : the substance that dissolves in a solvent to produce a homogeneous mixture

What Is a Solution? - Purdue Chemistry

Solution, in chemistry, a homogenous mixture of two or more substances in relative amounts that can be varied continuously up to what is called the limit of solubility. The term solution is commonly applied to the liquid state of matter, but solutions of gases and solids are possible.

solution | Definition & Examples | Britannica

Definition of solution. 1 a : an action or process of solving a problem. b : an answer to a problem : explanation specifically : a set of values of the variables that satisfies an equation.

Solution | Definition of Solution by Merriam-Webster

A solution is a homogeneous mixture of two or more substances. A solution may exist in any phase. A solution consists of a solute and a solvent. The solute is the substance that is dissolved in the solvent.

Solution Definition in Chemistry - ThoughtCo

A solution is a type of homogeneous mixture that is made up of two or more substances. A homogeneous mixture is a type of mixture with a uniform composition. This means that the substances cannot...

What is a Solution in Science? - Definition & Examples ...

A solution is a homogeneous mixture of two substances—that is, it has the same distribution of particles throughout. Technically speaking, a solution consists of a mixture of one or more solutes dissolved in a solvent. The particles of solute and solvent are molecules or ions, with one or more solvent molecules bound to each solute particle.

Solution - definition of solution by The Free Dictionary

Chemistry A mixture in which particles of one or more substances (the solute) are distributed uniformly throughout another substance (the solvent), so that the mixture is homogeneous at the molecular or ionic level. The particles in a solution are smaller than those in either a colloid or a suspension.

Solution | Definition of Solution at Dictionary.com

Solution. more ... A value, or values, we can put in place of a variable (such as x) that makes the equation true. Example: $x + 2 = 7$ When we put 5 in place of x we get: $5 + 2 = 7$ 5 + 2 = 7 is true, so $x = 5$ is a solution. See: Variable. Solving Equations.

Solution Definition (Illustrated Mathematics Dictionary)

Despite its name, a solution is not an "answer". It's simply a container for one or more related projects, along with build information, Visual Studio window settings, and any miscellaneous files that aren't associated with a particular project.

Solutions and projects - Visual Studio | Microsoft Docs

Solutions provide a framework for packaging, installing, and uninstalling components to match your business functionalities. Solutions allow the customizers and developers to author, package, and maintain units of software that extend CRM. Any customizations, extensions, or configurations performed in CRM are packaged, managed, and distributed using solutions.

Microsoft Dynamics CRM - Solutions - Tutorialspoint

In chemistry, a solution is a special type of homogeneous mixture composed of two or more substances. In such a mixture, a solute is a substance dissolved in another substance, known as a solvent. The mixing process of a solution happens at a scale where the effects of chemical polarity are involved, resulting in interactions that are specific to solution.

Solution - Wikipedia

Solutions are a homogeneous mixture of two or more substances. It has homogeneity at the particle level. Usually, people think of it as some liquid with either a solid or a liquid or a gas dissolved in it. However, this is not entirely true.

What is a Solution?: Components, Characteristics ...

A solution is a homogeneous mixture of two or more components in which the particle size is smaller than 1 nm. Common examples of solutions are the sugar in water and salt in water solutions, soda water, etc. In a solution, all the components appear as a single phase. There is particle homogeneity i.e. particles are evenly distributed.

Solution - Definition, Properties, Types, Videos & Examples

A solution is a mixture of two or more substances that stays evenly mixed. Substances that are combined to form a solution do not change into new substances. Some examples of solutions include seawater, gasoline, glass, steel, and air.

solution - Kids | Britannica Kids | Homework Help

In a stricter sense, however, an IT solution is an aggregation of products and services, as opposed to a single, discrete product. To accurately be called a solution, therefore, the antivirus software should be bundled with related products, such as a spam filter or backup service.

What is IT solution? - Definition from Whats.com

A solution is a mixture of one substance dissolved in another so the properties are the same throughout. A solution is composed of a solute and the solvent. The solute is the substance being dissolved and the solvent is the part of the solution that does the dissolving. The solute is of molecular size.

What is a Solution? - Edinformatics

A solution is a combination of liquid and solute molecules that is homogeneous. Water, concrete, or gaseous may be a solution. In comparison, a combination of liquids, gases and solids may be a solution.

Types of Solutions - Different Types, Homogeneous ...

A solution is a homogeneous mixture of solvent and solute molecules. A solvent is a substance that dissolves another substance by pulling the molecules apart through electrochemical interactions. The solute then diffuses through the solvent until the concentration is equal in all parts of the solution. A solution can be liquid, solid, or gaseous.

Solution - Definition, Types and Examples | Biology Dictionary

The Starch Solution is a low-fat plant-based diet that focuses on eating potatoes, whole grains, beans, vegetables, and fruit to lose weight.
