Evolutionary Tactics, A Blueprint for Action, The Real Light at the end of the tunnel from the Vietnam era. Sometimes it takes the perspective of history to unmask the true genius of a person, a book or a point of view. Perhaps even more telling, the first attempt to deal with the subject of Jim Channon's First Earth Battalion was through the vehicle of comedy. The Men Who Stare at Goats, the movie starring George Clooney did not treat the ideas at the core of the First Earth Battalion with anywhere near the attention they deserve. In fact one could say that the movie trivialized the concept through humor, and marginalized the principals as addled characters. The true nature of the First Earth Battalion can begin to be appreciated by reading the Operations Manual. A hand illustrated work of art highlighting a new direction for not just the military but the planet as well. The fact that Jim felt the army could take the lead in this matter speaks to his own brand of practical idealism that untold numbers of corporate leaders took advantage of on his retirement from the Army. Welcome to the new gold standard in critical care transport training. Published in conjunction with the American Academy of Orthopaedic Surgeons (AAOS) and the American College of Emergency Physicians (ACEP), Critical Care Transport offers cutting edge content relevant to any healthcare provider training in critical care transport. Like no other textbook in this market, Critical Care Transport thoroughly prepares medical professionals to function as competent members of a critical care team by covering the material that everyone—paramedics, nurses, physicians, and specialty crew—needs to know to operate effectively in the prehospital critical care environment. This book meets the curricula of major critical care training programs, including University of Maryland, Baltimore County (UMBC). It covers both ground and flight transport, and meets the objectives of critical care transport certification exams such as the Certified Flight Paramedic (FP-C) exam administered by the Board for Critical Care Transport Paramedic Certification. Content includes information specific to prehospital critical care transport, such as flight physiology, lab analysis, hemodynamic monitoring, and specialized devices such as the intra-aortic balloon pump. Standard topics such as airway management, trauma, and pharmacology are covered in the context of critical care. Chapters have been authored by leading critical care professionals across the country and represent the most current, state-of-the-art information on management of critical care patients.
