A sweeping and captivatingly told history of clothing and the stuff it is made of—an unparalleled deep-dive into how everyday garments have transformed our lives, our societies, and our planet “ Thanhauser . . . examines the effect of clothes on our environment, politics and even our ethics . . . admirable, meticulously researched . . . [and] makes us pay attention. ” —The Wall Street Journal In this panoramic social history, Sofi Thanhauser brilliantly tells five stories—Linen, Cotton, Silk, Synthetics, Wool—about the clothes we wear and where they come from, illuminating our world in unexpected ways. She takes us from the opulent court of Louis XIV to the labor camps in modern-day Chinese-occupied Xinjiang. We see how textiles were once dyed with lichen, shells, bark, saffron, and beetles, displaying distinctive regional weaves and knits, and how the modern Western garment industry has refashioned our attire into the homogenous and disposable uniforms popularized by fast-fashion brands. Thanhauser makes clear how the clothing industry has become one of the planet ’ s worst polluters and how it relies on chronically underpaid and exploited laborers. But she also shows us how micro-communities, textile companies, and clothing makers in every corner of the world are rediscovering ancestral and ethical methods for making what we wear. Drawn from years of intensive research and reporting from around the world, and brimming with fascinating stories, *Worn* reveals to us that our clothing comes not just from

the countries listed on the tags or ready-made from our factories. It comes, as well, from deep in our histories.

*Against World Literature: On the Politics of Untranslatability* argues for a rethinking of comparative literature focusing on the problems that emerge when large-scale paradigms of literary studies ignore the politics of the “Untranslatable” —the realm of those words that are continually retranslated, mistranslated, transferred from language to language, or especially resistant to substitution. In the place of “World Literature” —a dominant paradigm in the humanities, one grounded in market-driven notions of readability and universal appeal—Apter proposes a plurality of “world literatures” oriented around philosophical concepts and geopolitical pressure points. The history and theory of the language that constructs World Literature is critically examined with a special focus on *Weltliteratur*, literary world systems, narrative ecosystems, language borders and checkpoints, theologies of translation, and planetary devolution in a book set to revolutionize the discipline of comparative literature.
